

Figure 1 consists of four vertically stacked time-series plots showing the evolution of the normalized difference in the number of cases between the two countries from February 1 to February 28, 2020. Each plot has a y-axis ranging from -0.5 to 1.0 and an x-axis showing dates and times (0: and 12:). The plots show a general downward trend with significant fluctuations, including a sharp peak around February 15 and a sharp drop around February 20.

Sample size: 671  
Correlation coefficient: 0.959  
Mean Error: 0.010  
Standard deviation of error: 0.072  
Coefficients: -0.01    1.047  
RMS error: 0.072

Sample size: 54  
Correlation coefficient: 0.959  
Mean Error: 0.008  
Standard deviation of error: 0.067  
Coefficients: -0.01    1.039  
RMS error: 0.067
